

Full Wrap Directions

MOST RECENT directions are available <https://www.julabay.com/tumblerhelp> please check for updated copy before using.

To ensure that your full wrap will fit your tumbler, please use a fabric measuring tape and measure around the top rim, the bottom rim and the height of the cup. Also measure the opening across the top of the tumbler, and across the bottom of the tumbler. Compare to the sizes included in the file. You may need to tweak the sizing, so I suggest taking the design closest to your size, and playing with the sizing. Print in draft on normal paper to test the design before you use sub paper and sub ink, or expensive tattoo or waterslide paper. You may need to resize the print size depending on which software you are using to print and your tumbler measurements. I have tutorial videos explaining this on my website if you are a visual learner.
